NOFOMO

all your events, one place

Main events like ETH Denver are enriching for the community

Offering crucial learning, experimentation, and networking opportunities

But not only the main events

Over 300 side events at ETH Denver alone,
each offering unique experiences.

And what is the problem with it?

It's almost impossible to stay on top of everything.

Multiple Events

Access requirements or full capacity

Hundreds of different opinions

Roadmap 2024

Q1

- MVP Development
- Manual event integration with Cryptonomads
- Launch at EthDenver 2024
- Real user testing
- AI integration for event searches, event suggestions, and review moderation

Q2

- Optimization points and levels loyalty program model
- Implement brand alliances to provide platform membership benefits
- Code for sharing, generating points for both users to streamline the user base
- Reporting dashboard for partner organizers

Q3

- Exclusive surveys for partner organizers
- Evolve live event functionalities and reactions
- Integration with POAP to verify if the user has the event's POAP for a higher event score
- In Main Events, consider including Stands or mini-events relevant to the Main Conference

Q4

- Ticketing integration for easier event publishing
- App development for stores
- Event creation from NoFomo (own ticketing platform)
- XMTP integration for chat usability among event attendees or those with similar interests
- Push protocol integration for messaging
